YOU CARRY SAFETY 4.0 WITH YOU

PRL Solution of Industry 4.0

Why should I carry the new casing with the card?

We give you the white cover to put inside the identification card. This case or cover sends out a signal received by a system, and, **IN CASE OF EMERGENCY EVACUATION**, it facilitates the count at the meeting point or it will allow us to rescue you where you are.

Where should I take the card?

You must carry the card and the case with you, always and at all times.

How should I carry the case and the card?

IF YOU DON'T WORK WITH MACHINES, you can wear it hanging.
IF YOU WORK WITH MACHINERY, you must carry it in your pockets (to avoid entrapment with moving parts)

Is there any risk in carrying this case with me?

The case sends a little signal that it is not harmful to the person but, as we inform, sends a little signal, **IS NOT ALLOWED TO ACCESS WITH THE CASE INTO THE ATEX ZONES**. If you need to access into an ATEX zone, you must leave the case (and the identification card) outside of the ATEX zone.

Does it mean that I am always geolocated?

NOT IN ANY WAY. The Tag4Care™ system only recognizes the case code and it doesn't know who is his/her owner. In addition, the information is not saved anywhere if the emergency is not activated. **ONLY WHEN THERE IS AN EVACUATION ACTIVATED** the Tag4Care™ system asks to the Access Control system (SPEC) what people are these codes, with the sole function of managing the emergency and only while the emergency monitors the position of non-evacuated people. The project has passed the **INTERNAL ASSESSMENT OF PERSONAL DATA PROTECTION** and the **WORK COUNCIL** has been aware of the design and progress of the project.

If there is an evacuation and I don't have the case with me...

Whenever there is an evacuation, it must be evacuated following the established route and the indications. If you do not have the case, you must go to the counting staff to manually record your evacuation.

Will I be able to do the same functions with the card?

Of course, As you know, with the current card we can pay in the canteen, pick up clothing, sign in, photocopy, pay the coffees and vending, charge electric cars, etc, **EVERYTHING YOU COULD DO AND EVERYTHING WE WILL DO IN THE FUTURE, WILL FOLLOW**. "Don't suffer for coffees"

Who will carry this case with the card?

Except for the personnel who work at the SAB Chemical Plant, the rest of the internal and external workers who have their workplace or are visiting the center of Sant Andreu de la Barca, they will carry this case with the card.

How long does the cover last?

The case battery has an average lifespan of 3 years. With certain frequency we will verify the charge of the batteries to inform when the change will be necessary.
